

TEAM BRAIN!

ASTROCYTE

Supports the neuron,
provides nutrients,
and keeps the
brain healthy.

NEURON

Receives
messages and
sends signals.

OLIGODENDROCYTE

Makes myelin
sheaths that
insulate the axon
so signals travel
faster.

MICROGLIA

Protects the brain
by cleaning up
dead cells and
harmful germs.

EPENDYMAL CELLS

Line the brain's
ventricles and help
circulate cerebrospinal
fluid.
